#### ABOUT POSTAGE STAMPS.

A young Chicago stamp collector says that two of the teachers in his school are encouraging their pupils to take an interest in stamp collecting by offering prizes of packets of cheap stamps to those scholars gaining the best records in geography.

The new revenues seem to be well calculated to defeat the manipulations of the stamp washers through the extreme susceptibility of the black ink in which the figure is printed. Collectors who have tried to separate the stamps from paper by immersion in water have despoiled many of the stamps of the black impression through the action of the water.

Viceroy Chang Chi Tung, of the Chinese empire, has withdrawn his opposition to the extension to the interior of China of the postal system under the imperial maritime customs service. The system is being rapidly extended, 300 branch offices already being open. The postal rates are the cheapest in the world. In a very short time it will be possible to send from one end of China to the other a letter for one Waimanalo and all Koolau ports, 7 Mexican cent (less than half a United States cent).
